50 PER CENT. SAVED IN Plumbers' Work by using **JENNINGS'S CLOSURES**, which are made to act from the inside or a counter service pipe, without the complication of valves.
JENNINGS'S INDIAN RUBBER COCKS, for ALL purposes and all pressures, are most simple in construction, and very durable.
The Ball Cocks shut a cistern in half the usual time, and never get out of order.
JENNINGS'S SELF-CLOSING STOOL COCKS, for common Cistern Pans, prevent loss of water, and have been approved by the Sanitary Committee of the highest order to public buildings, Railways, and in India.
For illustrated particulars and prices apply to **G. JENNINGS**, 24, Great (North) Street, Birmingham.

STOCK & SON'S SOIL-PAN SERVICE-BOX.
The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes by the adoption of such an arrangement of thing soil-pans as will enable the "sanitary supply system" of water service to be made available for the removal of the refuse, by preventing the enormous waste of a soil pan of this description, to which water companies are so strongly and so properly object. By the use of this service box an ample supply of water is obtained, without the possibility of its being wasted by the propping the valve, which the handle, or by other means. It is so constructed that, so long as the drainage-valve remains open, a further supply cannot enter the service from the main.—(Drawings and description may be obtained from **STOCK & SON**, Manufacturers of all Plumber's Iron-work, Sanitary Boxes, Rotary Service-down Pipes, Fire Pipes, Gas Fittings, and Church Furniture in Iron and Brass, Temple-street, Birmingham.)
